Lower Shore Clinic offers Sliding Fee Scale billing options for anyone who does not have insurance or whose insurance does not cover services at our agency. Sliding fee scale billing options might reduce the cost of services to you in order to make services more affordable. Sliding fee scale billing is available for services like visits with your providers but does not cover things like medications or laboratory results. Lower Shore Clinic does encourage anyone who is eligible to consider using healthcare insurance, since it will help cover other services that the sliding fee scale does not.

To use the sliding fee scale, a person's annual income will be calculated, either using tax statements or a month's worth of income statements. Next, the attached table will be referenced to determine the eligibility for sliding fee scale billing based on the number of persons in a household and the annual income a household earns. A household counts as anyone you would file on your taxes, such as a spouse, children, or other dependents. Next, each person will either have a flat rate or a percentage of the original cost of any services they receive. This information will be reviewed with you by a member of our staff so you will be familiar with what your bill might be.

Sliding fee scale agreements will be renewed every year with current income information and the current sliding fee scale for that period.

Lower Shore Clinic clients are offered treatment regardless of sex, race, color, age, religion, sexual orientation, national origin, disability, political affiliation, state of residency, or how you choose to pay for care.
